## Memorandum

To: A. E. Sloat  
From: F. P. Haas  
Subject: \_\_\_\_\_

Date: 1/15/75

I understand from Joe Greer that you wish to know what the accounts of Jacob and Medinger labeled Account #3 and Account #4 represent. Account #3 is the central file available to company and litigating counsel. This central file is run under the direction of Gisella Cahnman and a small staff which analyzes scientific articles in the area of smoking and health so as to be available for counsel. It is separated from Account #4 because we have considered it to be lawyers' work product, and, therefore, not subject to subpoena.

Account #4 is utilized to obtain the services of doctors and scientists who could be available for Congressional hearings, litigation, etc.

I and the other lawyers who for several decades have been close to the litigation aspects of smoking and health have consistently found that the work done from funds generated from the above accounts have been extremely important in defending lung cancer and related cases.
